

# Mast Base Insulator

60-1047-001

Data Sheet

Figure 1 - Mast base insulator

The Lencom® 60-1047-001 is designed specifically to support RF mast bases.

The top and bottom surfaces are ground parallel with each other and at 90° to the axis.

Top and bottom collars are sanded.

Recommended Operating Voltage is 60% of wet-withstand voltage.

## Product Information

Download—no lateral force (rated for compressive force only)	1.2 tonne
--	-----------

Dry Withstand Voltage	65kV
-----------------------	------

Wet Withstand Voltage	20kV
-----------------------	------

Height (including collars)	218mm
----------------------------	-------

Diameter	128mm
----------	-------

Collar height	30mm
---------------	------

Weight	4.2kg
