

MAST BASE INSULATOR

60-1047-001

Data Sheet

The Lecom 60-1047-001 is designed specifically to support RF mast bases.

The top and bottom surfaces are ground parallel with each other and at 90° to the axis.

Top and bottom collars are sanded.

Recommended Operating Voltage is 60% of wet-withstand voltage.

Download—no lateral force (rated for compressive force only)	1.2 tonne
Dry Withstand Voltage	65kV
Wet Withstand Voltage	20kV
Height (including collars)	218mm
Diameter	128mm
Collar height	30mm
Weight	4.2kg

Specifications subject to change without notice
