

9m, 12m and 15m Masts LA011, LA006, LA007

AT A GLANCE

Designed for HF wire
antenna support

VHF/UHF spigot option

Lightweight

Compact for air
shipment

Complete package

The **Lencom® LA011, LA006** and **LA007** masts are designed to support HF wire antennas. The optional spigot enables VHF and UHF antennas to be fitted at the top of the mast.

Constructed of marine-grade aluminium tubing, each mast comprises three, four or five 3m sections.

They are supplied as compact, lightweight assemblies suitable for air freight.

The **LA011** is guyed four ways at the 3m, 6m and 9m levels, the **LA006** 3m, 6m, 9m and 12m, and the **LA007** at 3m, 6m, 9m, 12m and 15m.

Star pickets are supplied to anchor the guys, which are dielectric rope.

These should be considered temporary, and only for suitable soil types. Engineered base and anchor points should be used for permanent installations.

An outrigger (gibbet) is supplied to enable an antenna to be raised or lowered.
