

Tactical Telescopic Mast

02-00045 | 6m

Data Sheet

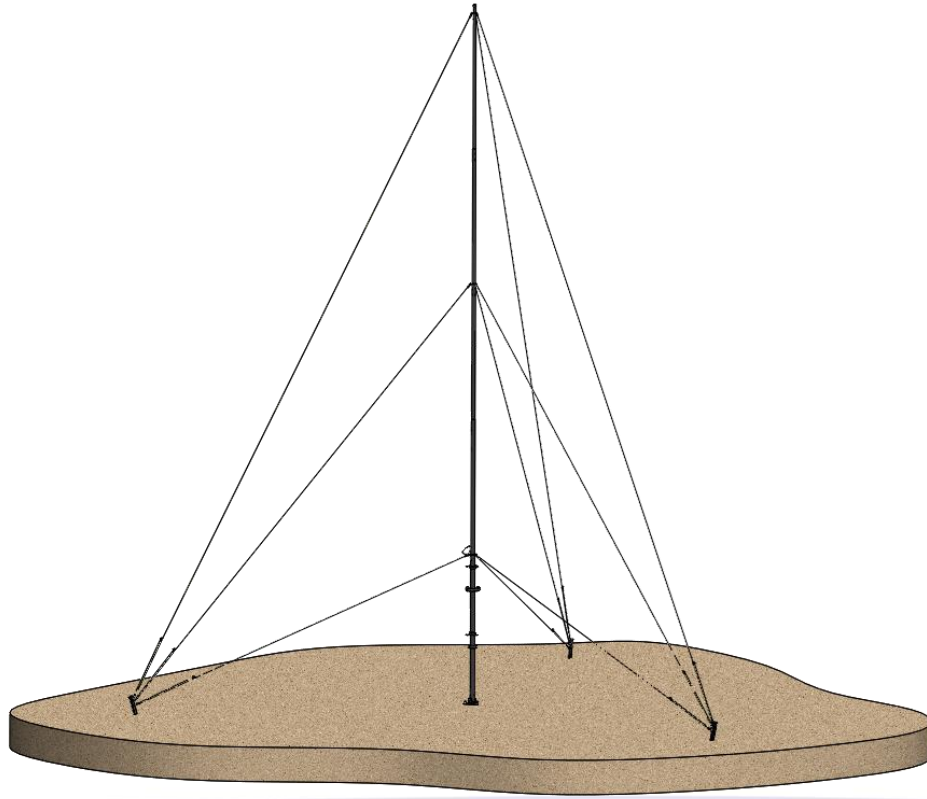

Figure 1 – Installed 02-00045

The Lencom® 02-00045 is a lightweight, transportable, telescopic mast that is ideal for rapid deployment for immediate communications.

Product Information

The mast can be installed by a single person in only 5 minutes.

The mast has a flexible design that allows it to be deployed on sloping terrain.

All of the elements of the mast are self-contained and come attached to the mast so that the entire kit can be carried in one hand – with or without a bag.

The mast is supplied in a canvas bag with installation instructions.
