

Figure 1 – 01-1019 Extension Kit

This extension kit is designed to improve the efficiency of the Lencom® 02-4010-001 mobile HF antenna when stationary.

It is the complete package required and is easily and quickly deployed.

Product Information

Each additional element is 1.3m high.

One, two or all sections can be installed, together with the original antenna sections.

The guying disk has captive guys with snap hooks and adjustment cleats.

The guy assembly comes rolled on to a light-weight winding frame.

Guy stakes with fitted D shackles are provided for use if soft earth anchorage points are available.

The total height, including the original sections, is 7m.

Packed weight: 7kg

Packed dimensions:

1,450mm (L) x 240mm (W) x 100mm (H)
