Data Sheet

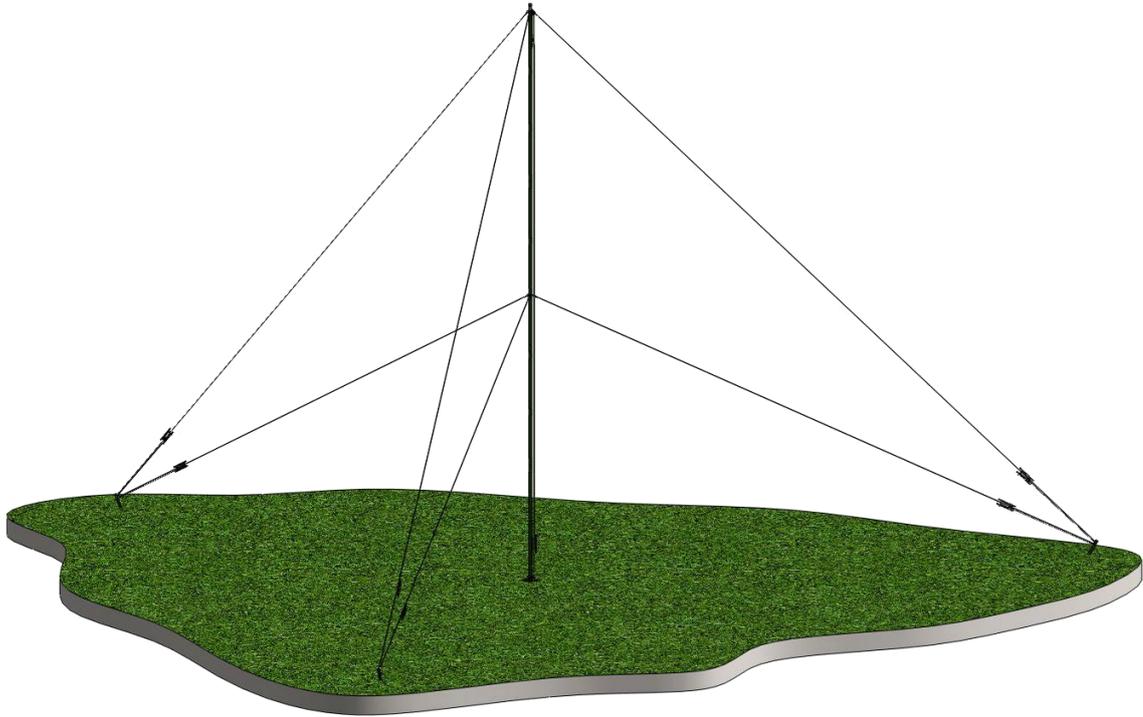

Figure 1 – Installed 02-2166 mast

The Lencom® 2166 tactical mast is designed with rapid deployment in mind, both of itself and an associated HF antenna.

This means lightweight mast sections that two people can connect and then erect.

Product Information

Constructed of blackened, high strength, aluminium, the Lencom 2166 tactical mast comprises ten sections that simply slide together.

The mast is guyed three ways at the 4m and 6m levels, and a quick-connect pulley and halyard system is supplied to enable rapid and easy raising and lowering of wire antennas.

Anchor pegs are supplied for the guys and are pre-drilled to accept the guy snap hooks.

All installation hardware is supplied, packed in a rugged canvas bag for ease of transport.
