

Stub Mast, 2m 01-1012

AT A GLANCE

- Complete kit
- Installed easily
- Easily transported

The Lencom® 01-1012 stub mast was designed to support HF antenna element ends.

2 metres in height, they are held in place by pegs through the welded base plate, and wire rope guys to the anchors.

The antenna is attached to a closed hook on one side of the mast, and the guys to a closed hook on the other side.

The stub mast includes the mast, pegs, guys and anchors.

Lencom can provide a range of masts for antenna installations.

The [standard mast range](#) include 9m, 12m and 15m masts.

The [10m lightweight](#) range provides for erection by one person.

The [tactical range](#) covers 6m and 10m masts designed for rapid deployment.

Lencom manufactures a large range of [HF antennas](#) - [please enquire](#).
