

9.5m Base Station Vertical Whip Antennas

AT A GLANCE

Permanent or portable operation

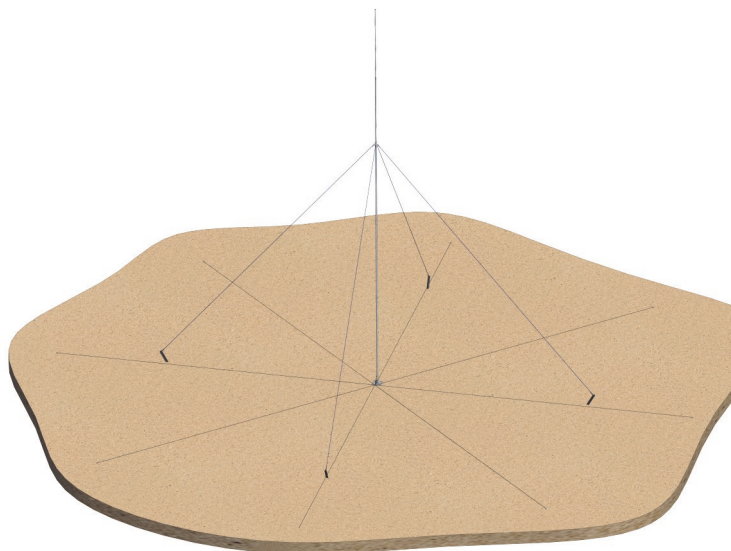

Extremely light

One person erection

Rapid deployment

Short package designed for air transport

Perfect for rapid deployment needs

LB009 shown with LA003 earth mat

The Lencom 9.5m Vertical Whip Antennas are perfect matches for the [Lencom 4006 Automatic Antenna Tuning Unit](#).

They are ideal for locations that provide limited room for antenna installations; ground-mount and roof-mount variants are available.

Optional earth mats are available, and highly recommended.

The complete package is short enough for transport by air.
